

Taste The Innovation in Dairy Alternatives

Achieving functionality and nutritional parity to real dairy using alternative dairy ingredients is now a reality, but taste and mouthfeel challenges from these unique ingredients exist.

Leverage Edlong's experience, tools, and technologies for **flavor solutions** that will help you:

- develop delicious foods and beverages
- overcome taste challenges
- get products to market faster through true collaboration

"Fermentation technology has been used by Edlong for decades, and now the food industry sees 'precision fermentation' as the next frontier for the substitution of animal origin proteins. Our 100+ years of experience in the taste of dairy means we are already ready for it!"

- Lourdes Mato, Edlong Dairy Research Scientist
